

Apichai Tochonnabod

Sr QA Automation Engineer

Bangkok, Thailand - +66 96 242 3402 - matthewkenn00@gmail.com - linkedin.com/in/mattapichai/

Summary

Experienced Senior QA Automation Engineer with a passion for taking on challenging automation problems and a solid commitment to maintaining high-quality standards in fast-paced environments. I am always looking for ways to improve my technical skills and seek to advance into senior or lead positions. As a Thai citizen, I bring a unique advantage to the table with my fluent English communication skills and international perspective, which lets me easily navigate and contribute to diverse work environments. My expertise includes Python, Mocha Typescript, Robot Framework, and Selenium. I have a proven track record of successfully leading and maintaining automation projects from start to finish. I am highly skilled in building robust testing frameworks and integrating CI/CD processes, which ensures that projects are efficient and reliable.

Work & Related Experience

Refinitiv

April 2023 - Present
Contract

Sr QA Automation Engineer

- Implemented automated testing procedures using TypeScript, reducing testing time and increasing efficiency
- Maintained a library of automated test scripts promoting reusable code and consistency
- Continuously refined testing methodologies to keep pace with industry standards and emerging technologies
- Integrated and managed Continuous Integration/Continuous Deployment (CI/CD) pipelines, enhancing the efficiency and reliability of the software development lifecycle.

Fuse InsurTech

Jan. 2023 - March 2023
